

## SMALL TEST OF CHANGE (example)

STOC initiated for indicators scoring <70% following performance measures in round 1 done in March 2011.

### 1. Improving treatment preparation for all patients starting anti-retroviral therapy (ART) at the facility to 100% within four months.

**Problem:**

- Patients who were transferred in were not receiving treatment preparation.
- Prevention of mother-to-child transmission (PMTCT) patients not receiving treatment preparation.
- Treatment preparation being done but sometimes not documented (e.g. when done for caregivers of pediatric patients, not documented in child's folder).

**What to do:**

- All patients irrespective of treatment status to get treatment preparation.
- Treatment preparation form to be completed and placed in patient's chart.
- PMTCT patients to get complete treatment preparation sessions even if they have been commenced on treatment.

**Measure:** Monthly documentation audit, monthly community based testing service (CBTS) section of quality of care (QoC) tool.

**Responsible persons:**

**Monthly follow up scores**

Month/week	Number of charts reviewed	Score (percentage)
March (R1, performance measure)	65	60%
April	8	50%
May	9	100%
June	10	100%
July	8	100%
August (R2, performance measures)		

## SMALL TEST OF CHANGE (fill out this template for your own STOC)

STOC initiated for indicators scoring <70% following performance measures in round \_\_\_\_ done in \_\_\_\_.

**State what you are trying to improve giving the measurements and timelines and specify the population involved.**

**Problem:** *(list why this indicator is scoring low)*

**What to do:** *(list a few practical things the team will do to improve on this indicator)*

**Measure:** *(after the performance measures, how will you measure this indicator every month?)*

**Responsible persons:** *(name who will be in charge of monitoring this particular indicator)*

**Monthly follow-up scores** *(fill out the monthly scores obtained for this indicator in the table below)*

Month/week	Number of charts reviewed	Score (percentage)
March (R1, performance measure)		
April		
May		
June		
July		
August (R2, performance measures)
