

On the Forefront of Assessing the HIV Epidemic in Africa

The Activity Information Management System (AIMS) dashboard pictured above was developed by Ciheb to facilitate real-time monitoring of survey implementation. It was first used in the 2018 Nigeria HIV/AIDS Indicator and Impact Survey (NAIS).

Working in partnership with national ministries of health, Ciheb has been conducting population-based HIV impact assessments (PHIAs) in Africa. This month PHIAs in **Zambia** and **Botswana** begin collecting new data!

Amplifying the ECHO Effect for Quality HIV Care in Nigeria

The Extension for Community Health Outcomes (ECHO) project in Nigeria has been expanding workforce capacity for the delivery of high-quality HIV care and treatment. Recently, Ciheb hosted a three-day ECHO immersion training session in Abuja to facilitate greater use of the model among implementers.
