

Differentiated Service Delivery Improves HIV Care in Western Kenya

Differentiated service delivery (DSD) is a client-centered approach to HIV care and treatment that tailors clinical services to meet the needs of each client. This could include various creative solutions like multi-month dispensing, different clinics for different populations, and flexible operating hours. In the PACT Timiza program that recently completed, Ciheb in Kenya used DSD to support an estimated 90,000 people living with HIV.

PrEP Used in the Fight to End HIV in Kenya

In 2017, the Government of Kenya adopted a new policy rolling out pre-exposure prophylaxis (PrEP) as part of a national HIV combination prevention strategy. Ciheb in

Kenya's PACT Endeleva program then aligned with the government and started offering PrEP that same year to the benefit of thousands of clients in Nairobi.

Remembering Dr. Toma Guberski

With tremendous sadness, Ciheb mourns the passing of Thomasine “Toma” Guberski, PhD, CRNP, a decades-long pillar of the University of Maryland, Baltimore and Institute of Human Virology community. Dr. Guberski, a PhD trained nurse practitioner, dedicated much of her career serving as part of a multidisciplinary team of HIV experts supporting the development of comprehensive care and treatment models to provide antiretroviral therapy to HIV/AIDS patients in Baltimore and across sub-Saharan Africa, benefitting millions of lives.
